

## PARISH OF CHARDSTOCK 1891 CENSUS RG12/1668

The census was carried out on the night of 5th April 1891 and followed the format of the previous censuses taken since 1871. The head of the family still had to be defined as did the relationship to the head of each person staying in the house that night. The gender of each person was also recorded. Accurate ages were required throughout and were taken from the person's last birthday. For infants under one year, the age was recorded either in months (m), weeks (w) or days (d). The rank, profession or occupation of each person was recorded and "Where Born" had to be completed by giving the county and town or parish of birth.

The expanded list of infirmities introduced in 1871 was retained, but was sometimes used to record medical conditions not included in the official list. The 1891 census varied from those taken previously in three ways:

The Occupational Status of each person in employment had to be categorised using three options - Employer (Er), Employee (Ee) or Neither (N).

Single (code S) replaced Unmarried (U).

The number of rooms occupied by each household had to be recorded if less than five.

It should be remembered that at the time of the census Chardstock formed part of the County of Dorset, as the transfer to Devon did not occur until 1896.

An analysis of the recordings for Chardstock is tabled below, together with comparisons for each census since 1841. The Boarding School/College (1861 - 1881) and the Industrial school (1861 only) have been extracted from the remainder of the Parish and are shown separately.

(a) Due to the different way in which the 1891 census was completed, it is not possible to calculate the total number of dwellings, nor those in multiple occupancy. However, this census did record the number of rooms occupied by each household if less than five and examination of the return for two or three room households can provide clues as to whether these households were sharing with others.

The 1891 return records that the population of the Parish continued to contract, albeit at a slower rate than that experienced between 1871 and 1881. The overall reduction from 1881 to 1891 was 102 persons or 8.3% of the population and from 1871 to 1891 288 persons or 20.4%. Thus in the twenty years to 1891 the population decreased by a fifth. There were significant reductions in all the age groups below 59 with the greatest affected being children aged under 10 whose numbers dropped by a third between 1871 and 1891.

The figures for 1891 follow the well established pattern whereby young adults left the Parish to seek work elsewhere; the net overall reduction in the 20 to 29 age group being 97 or 40% when compared with the 10 to 19 age group.

The population was divided evenly between the two genders with 565 males and 561 females being recorded in the census.

After discounting those associated with the church or schools, in 1891 only 30 people were recorded as having been born outside the adjoining counties of Devon, Dorset and Somerset.

The following transcript was made by members of CHRG from copies of the original documents. When extracting information from this transcript, the following points should be noted:

The Parish of Chardstock was subdivided into three Enumeration Districts, Nos. 1, 2 and 3. By 1891 a formerly detached part of the Parish of Chardstock at Crawley had been transferred to form part of District No. 7 of the Membury census. These dwellings remained in the Ecclesiastical Parish of Chardstock and are included at the end of the transcript. The return for each Enumeration District was compiled by a different person and this resulted in a lack of consistency across the complete return. This applied, in particular, to the new category of Occupational Status, which was clearly not understood by those completing the return and resulted in many errors and omissions. One unfortunate effect of this change was that farm acreages and the number of men/boys being employed was no longer recorded. The tendency to record some forenames by just a capital letter continued throughout the return.

Although the overall standard of the census continued to improve, there are still some cases where the return has been incorrectly completed. "Notes" have been added to correct any obvious errors.

The 1891 return required the number of occupied rooms to be recorded if less than five. This is shown in the transcript by the number in brackets after the name or location of the dwelling.

For the "Relation To Head" column, relationships are given in full wherever space permits. When it does not, the following abbreviations are used:

Dau	Daughter
GSon	Grandson
GDau	Granddaughter
GFather	Grandfather
GMother	Grandmother
SonLaw	Son-in-Law
DauLaw	Daughter-in-Law
MothLaw	Mother-in-Law
FathLaw	Father-in-Law
BroLaw	Brother-in-Law
SisLaw	Sister-in-Law
Appren	Apprentice
Asst	Assistant
Govr	Governor
Govs	Governess
Hkeeper	Housekeeper
NMaid	Nursemaid
Serv	Servant

Shortening of forenames has been avoided wherever possible with full names being given in the transcription; an exception being "Jos", as this could refer to either Joshua or Joseph. Also, full stops have not been used in names, thus Wm. C. Larcombe in the census return appears as William C Larcombe. This measure is designed to assist word search software programmes. By the same logic the town or Parish of birth is given in full, whenever possible.

In the transcription the column headed "Condition" in the census return uses the abbreviations M for Married, S for Single and W for Widow or Widower.

In cases where other research has produced an alternative to the transcribed version, that alternative is shown alongside the transcribed version in [ ] brackets provided the alternative has an equal or greater likelihood of being the correct or preferred version.

To save space and achieve consistency, the place of birth is given first, followed by the county, indicated by the use of the "Chapman County Code" system.

The codes used in this Census are listed below:
